SUBCUTANEOUS PORT SYSTEM FOR DRUG DELIVERY 6 FR

Product Group Code: 0004-1290

Product Description:

A port reduces the number of needle sticks for medication, fluids, nutrition, blood products, and blood samples. However, a needle stick is required to access the device.

A port can stay in for a very long time.

Some medicines can irritate blood vessels. A port is placed in a large vein with high blood flow so there is less irritation. With some types of ports, more than one type of medication or solution can be given at the same time.
